

ER-Powder

Concentrated emulsion remover powder

DESCRIPTION

ER-Powder is a highly concentrated emulsion remover designed for fast removal of emulsions and capillary films from screens. Easy to use product begins to work on contact.

ADVANTAGES

- Fast Acting
- Biodegradable
- Fast removal of hardened emulsions
- Drain safe
- Contains No VOCs
- No Odor

DIRECTIONS

In a plastic container, combine the contents of package with water at desired concentration and mix thoroughly. For standard strength solution, mix 1½ - 3 ounces per gallon of water. For extra strength, mix 4 – 6 ounces per gallon of water.

After removing ink from the screen, spray or wipe ER-Powder solution in a uniformly applied pattern working from side to side and from bottom to top on the print contact side of the screen. Wipe screen with sponge or cloth for maximum effectiveness. Allow to stand for 1 – 3 minutes. Remove emulsion using a medium pressure, low volume cold water rinse. Allow screen to dry completely before recoating.

TYPICAL PRODUCT PROPERTIES

Appearance ----- White, free flowing powder
Odor----- None
pH, 1% solution ----- <4.5
Flash Point ----- None
Stability ----- Stable
DOT Shipping ----- Corrosive (50 lb. Pails)
LTY QTY (2 lb. jars)

AVAILABLE PACKAGE SIZES

50 Lb. Pail ----- #01483-P5004
2 Lb. Jar ----- #01483-B5001
